AN INDEX TO *HUMAN COMMUNICATION RESEARCH*, 1974-1983

MARK L. KNAPP and DOROTHY A. STRUCK
State University of New York at New Paltz

The articles appearing in *HCR* during the preceding nine years (from Fall 1974 through Summer 1983) have been indexed by *authors' names* as well as *key words* to indicate the primary content area(s) addressed in each article. One or two key words were usually selected from the title of the article. If the title did not seem to provide words that adequately described the primary subject matter, key words were selected from the abstract, the article itself, or, on rare occasions, words chosen by those compiling the index.
